

APÉNDICE 1

Abundancia relativa por género para cada orden en la época húmeda y seca

APPENDIX 1

Relative abundance by gender for each order for the wet and dry season

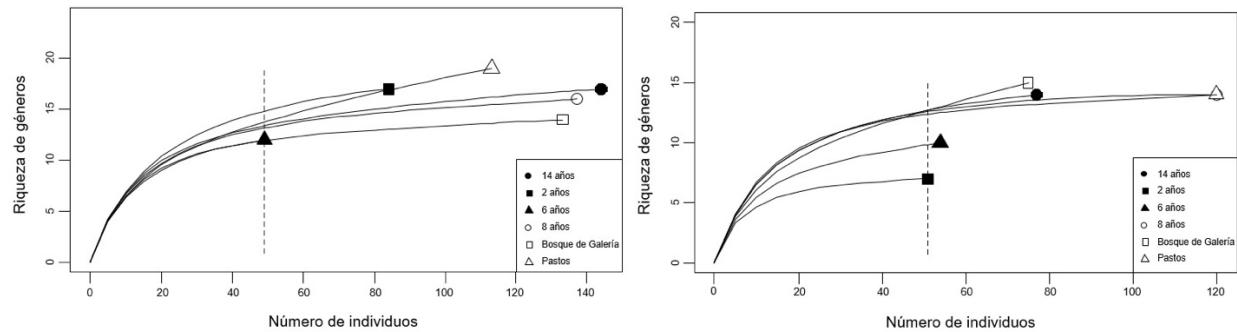

Orden/Género	Cobertura	2 años	6 años	8 años	14 años	Bosque de galería	Pastos	Total
	Húmeda	Seca	Húmeda	Seca	Húmeda	Seca	Húmeda	
Entomobryomorpha								
<i>Cyphoderus</i>	3 (3,5/11,5)	1 (1,9/3,8)	0 (0/0)	1 (1,8/3,8)	4 (2,9/15,3)	7 (5,8/26,9)	2 (1,3/7,6)	0 (0/0) 1 (0,8/3,8) 5 (4,1/19,2) 26 (2,2/100)

APÉNDICE 2

Curva de acumulación de géneros de colémbolos por cobertura en época húmeda (izquierda) y época seca (derecha)

APPENDIX 2

Accumulation curve of genera of springtails by coverage wet season (left) dry season (right)

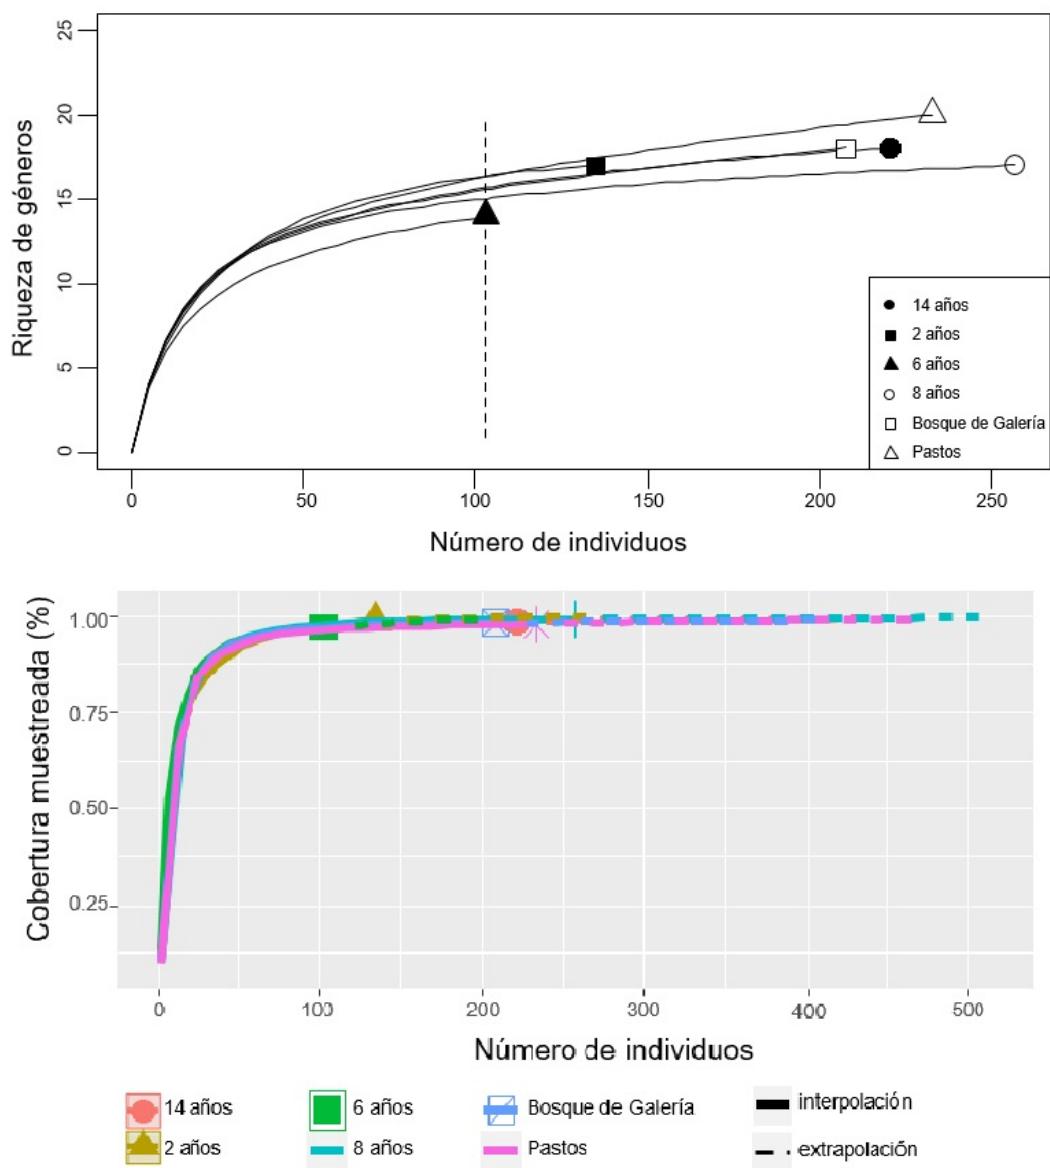

APÉNDICE 3

Curva de acumulación de géneros de colémbolos por cobertura (A), Porcentaje de completitud de géneros de colémbolos por cobertura (B)

APPENDIX 3

Accumulation curve of genera of springtails by coverage (A), Percentage of completeness of genera of springtails by coverage (B)

APÉNDICE 4

Variables explicativas en RDA para pastos, plantaciones de *E. pellita* y bosques de galería

APPENDIX 4

Explanatory variables in RDA for pastures, *E. pellita* plantations and gallery forests

Variable	Varianza	F	P
Nitrógeno (%) ***	0.037198	8.6707	0.001
Altura (m) ***	0.019886	4.6355	0.001
% Exposición de suelo alrededor de la trampa *	0.011323	2.6394	0.013
